IN REPLY REFER TO:

3809

UT-055-91-22N
(U-055)

August 11, 1992

Jay T. Rogers
P. O. Box 17
Fillmore, UT 84631

Dear Mr. Rogers:

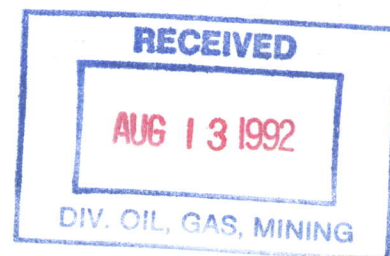

Your notice to conduct mining related operations on your claims, BLM serial numbers, 102503, 102504 in T. 21 S., R. 9 W., Sec. 19, has been received and accepted by this office. Your notice has been assigned case file number UT-055-92-11N. Please use this number in any future correspondence concerning this notice. Your previous notice for mining related operations, serial number UT-055-91-22N has been administratively closed and combined into this notice.

Our inventory of Threatened, Endangered and Sensitive Animals records the presence of four Golden eagle nests and a minimum of three Prairie falcons eyries within one mile of your mining claims. Their nesting and breeding season extends from March 1st to June 30th. Please inform this office prior to conducting operations during this time, so we may examine these nests for activity. Should a raptor build a nest in the vicinity of the proposed exploration, then resumption of activities will not be allowed during the period from March 1st to June 30th, to prevent possible nest abandonment.

If you change your operation from what is described in your notice, please contact this office prior to the change. If your operations extend for more than one year, please advise this office of the status of your mining related activity on the anniversary date of your notice.

A copy of your notice has been sent to the Utah Division of Oil, Gas and Mining (DOGM); therefore, you will not have to file this notice with DOGM. However, reclamation under this notice is required to conform to the standards of the Utah Mined Land Reclamation Act. All appropriate State water quality permits must be obtained prior to the commencement of the proposed activity from the Utah Department of Environmental Quality, Division of Water Quality, located at:

1636 West North Temple
Salt Lake City, Utah 84116-3156

As required by 43 CFR 3809, Surface Management Regulations, reasonable measures must be taken to prevent unnecessary or undue degradation of public lands during your operations. Please notify this office upon completion of operations and reclamation, so an inspection may be conducted on the site.

On July 14, Rody Cox conducted a joint inspection of your mine with Paul Sjoblom of the Utah Division of Oil Gas and Mining's Abandoned Mine Land Reclamation Program. As of yet, the division has no plans to conduct any reclamation on the site, but Mr. Sjoblom did indicate that the shafts may qualify as a future project.

If you are still interested in obtaining material with which to fill in your shafts, please consult us and we will try to locate an appropriate and convenient source. Due to stipulations in the mining laws concerning removing such material from mining claims, it would probably not be worthwhile to contact your neighboring claimant about using the stockpiles on his claims for that purpose, a possibility we discussed in an earlier meeting.

Acceptance of your notice will not now, nor in the future, serve as a determination of the validity nor ownership of any mining claim included under your notice.

Thank you for submitting your notice. If you have any questions regarding this letter, please feel free to contact Rody Cox at (801) 743-6811.

Sincerely,

For Dave Henderson
Area Manager
